For the 2015 calendar year, there were 34 fatalities on Tasmanian roads which is one less than the 35 recorded in 2014. This is a 9.7 per cent increase on the five year fatalities average of 31.0 (2010-2014).

## c) DISCUSSION PAPER AND FEEDBACK SURVEY PRESENTATION

### DISCUSSION

RSAC noted the draft Towards Zero Strategy Discussion Paper and the feedback survey.

Members agreed that a two-page summary flyer of key findings should be developed and made available alongside the online copy of the paper. It was also noted that the feedback survey was quite long and that it could be sectioned into parts to ensure at least a partial response.

Paul Bullock noted that motorcycle training was not mentioned in the Discussion Paper. It was suggested this proposal be included in the submission from the Tasmanian Motorcycle Council.

RSAC agreed that the paper needs to emphasise a sense of urgency and highlight that more still needs to be done to reduce road trauma.

Members discussed minor changes to the paper and survey including having a section in the feedback form to indicate participant's predominant form of road use.

RSAC endorsed the Discussion Paper and Feedback Form subject to minor changes discussed.
